STACKABLE RACKS / STACKABLE FRAMES

16 Stack racks stored in 2 neat piles

Versatile space saving storage is what this rack is all about. The 4" under clearance allows for easy fork truck accessibility. Units can stack up to 20 feet high. Sturdy, welded construction gives these units an abundance of strength and stability.

Stacking racks stack 4-5 high and can be easily disassembled or knocked down when not in use. Rather than dedicate substantial amounts of floor space to permanent rack systems, use portable stack racks to obtain maximum storage density and efficiency.

If your business has seasonal peaks and valleys, stacking racks can be easily disassembled and stored within a very small "footprint", thereby recapturing valuable floor space for other activities.

Portable stack racks can be used as a shipping racks. Advantages include saving on expensive cardboard boxes that can now be eliminated, increasing density in transit (freight savings) and collapsibility.

Stack racks help you greatly reduce costly dunnage. Shipping containers are typically able to be knocked down and returned to the point of origin for reuse.

Used for long-term or as temporary storage next to machining work stations.

Perfect for last-in, first out inventories. Just stack them against the wall as deep as you please.

Specifications:

Model		Capacity	Inside Dimensions (mm)	Overall Dimensions (mm)
Stackable Rack	Number	(kg)	L x W x H	L x W x H
	Stack-1402	750	1300 x 850 x 1000	1400 x 900 x 1200
	Stack-1312	750	1200 x 1150 x 1000	1300 x 1200 x 1200

Tyre storage in stack racks

Carton storage in stack racks

Can be put away in neat pile when not in use.

MR-1000

Die and Mould racks are very convenient to use die / mould storage devices with a built in lifting and lowering chain hoist. The drawers are sturdy and can be pulled out and pushed back with the load. In order to remove a die or mould from the rack simply put out the drawer on which the mould is placed. Pull the monorail trolley and the chain hoist above the mould. Attach the hook of the hoist to the mould. Lift the mould with the chain hoist about 2 inches above the drawer. Push back the drawer into the rack and lower the mould to the ground or to a pallet lying in front of the rack. The mould can now be moved to the machine with a pallet truck. Simple isn't it. For loading the mould/die simply follow the reverse procedure.

Specifications:

Model	MR-1000
Capacity	1000kg
Overall size	3100 x 840 x 2550mm
Shelf size	900 x 600mm
Number of shelves	9 nos
Shelf travel	380mm
Load capacity bottom shelf	1000kg
Load capacity middle shelf	850kg
Load capacity top shelf	700kg
Chain block capacity	2000kg
